

### **How to use the cross reference guide.**

Find your printer manufacturer and model number.

If it says "100/200" then you can use either the JETPAK1 or the JETPAK2 mailer to process the cartridge. You can always use the color mailer to process a black cartridge, but why pay extra?

If it says "200" then the cartridge can only be processed with the JETPAK2 color cartridge mailer.

If it says "compatible" then look in the Part # column for the part number of the compatible.

If it says "N/A" in all three columns then the cartridge cannot be refilled nor is there a compatible available for it at this time. Please contact us for other options at [sales@precisiontoner.com](mailto:sales@precisiontoner.com) or call (800) 787-8601 or (301) 317-4000.
